About Makondo Steel Limited.

Is an indigenous Zambian influenced company established in 2014, Makondo steel limited is focused on industrial steel construction projects that primarily involve fabrications and erection of steel structures, pre-fabricated buildings, roofing and cladding, stub columns, setting profiles, designs and construction works.

With the experience of some years in construction and steel structure building manufacturing sector, M.S.L was founded to provide high-end solutions to all kinds of steel structure building requirements from design to erection, as M.S.L we manage projects from Initiation to Closure to handing over effectively, also general steel fabrication and welding.

As a company that is based in Lusaka, Zambia, we have an advantage of easy access to high quality materials and technical resources. This advantage allows us to provide some sort of steel building solutions with competitive costs. In this way we don't only serve in Lusaka but also other parts of the Country.

As a result of leverage effect of strong technical knowledge and management skills, M.S.L serves with its solution partners for relatively large scale projects. With the wide experience in project management, M.S.L is able to ensure a reliable environment for the stake holders by conducting the processes correctly and effectively.

Besides commercial constructions, Makondo steel limited is also involved in the area of residential construction and is also experienced in all kinds of housing units.

Health, Safety and Environment

Our work is one of the most hazardous job that includes many hazardous tasks and conditions such as working at heights, power tools, equipment and lifting operations. Within the field of construction, it is important to have the guidance of safe working methods that were tested previously. Our safety programs help us to extract well documented safe working methods from our past experiences, that is the reason why we complete complex tasks safely by adhering to safety standards. Therefore, at M.S.L we're committed to managing health and safety risks effectively in all of the company's operations and insure that M.S.L products/operations do not harm its employees, suppliers, members of the public or indeed its clients.

Social Responsibilities

M.S.L, believes that operating its business based on sound ethics and values offers clear benefits to all of its stakeholders. It also believes that business success along with sound principles of environmental stewardship and corporate citizenship are all an essential part of how it operate its business. As a company it knows that it has a duty to contribute to the common good of the community in which it operates from. Therefore, M.S.L ensures that through mutual understanding and responsible behavior ,it integrates the principle of corporate social responsibility in all of its activities.

Objectives

Makondo Steel Limited's Objectives are:

- Produce good quality products that will not only be appreciated at the local level but internationally too.
- Create a conducive business environment that will benefit all parties involved.
- With a direct link to our new local and international suppliers, we intend to be the reasonably priced manufacturers of our products

Quality Assurance

From the projects that we undertake, we proceed by performing the necessary checks at all stages to insure the exacting technical specifications and standards. Quality assurance for M.S.L is one of the first priority and stringent measures, quality control is practiced from manufacturing, to erecting, roofing through to completion. Our quality management and assurance system's guaranteed.

Quality Management Policy

At M.S.L we believe that every member of the company shares the responsibility for quality and quality improvement.

Therefore;

- The company site managers/foremen through their own practice and standards will endeavor to lead by example. They will give complete commitment and allocate the necessary effort to the quality performances.
- Everyone has a scope to contribute to continually improvement.
- We will compare our performances with those of our competitors sharing the benchmark with all relevant staff within the business (company)

- Our quality management approach and its operations will enable us to maintain our performance from inception.
 - Quality process and control will be implemented in a systematic and planned way across the business to allow us too consistently;
 - Exceed our customer expectations by ensuring appropriate two-way communications are maintained to enable us to fully understand and fulfil their requirements.
 - Set measurable targets to monitor our achievement towards predetermined objectives.
 - Evaluate our performances against these targets to identify progress.
 - Provide appropriate resources and a suitable working environment.
 - Monitor, audit and review our systems to identify areas of our weakness and improve on them.
- To accomplish this, M.S.L has established a documented, implemented and maintains an effective quality management system within its integrated management system
Which is aimed at getting it right first time rather than inspecting quality but poor works.

Our interest is to delight our customers and develop relationships of the quality policy. Unlimited responsibility for the achievement of this objective rests with the managing director supported by directors, managers and engineers with the responsibility and authority to implement company policies
M.S.L. does however, recognizes that their staff are the single most important resources in the achievement of this policy and so we encourage a positive and open culture by providing developmental training communication and education ensuring that everyone is empowered to contribute using a wide range of methods and media.

Project Management and Workmanship.

Fabrications and Erection of Steel Structures.

M.S.L provides fabrications, erections and roofing products of light and heavy steel structure for industrial requirements such as; **Warehouses, Storage sheds, High rise buildings, Girders, Canopies, milling plants, sliding gates, tank stands, palisade fences, window frames, school furniture and hospital beds,also general steel fabrication and welding** are some samples which are related with that area of products. Manufacturing and erection of light gauge steel frame buildings is also another expertise of Makondo Steel Limited. Seperation of work packages like fabrication, erection and roofing often

causes miscommunication problems and results in variances from project schedule and cost baselines. To solve these issues caused by working with separate companies, Makondo Steel offers one project Manager/Foreman for all work packages. In regards with Steel Structures, with our accumulated experience over the years, we offer a combined project management and services in the areas of design, fabrications, erections, roofing and constructions.

Roof and Façade Cladding Works

We carry out and manage industrial projects from initial design stage to initiation, to closure, to handover, including labor, machinery lodging costs. Not only fabrication and erection are the packages but, roofing, façade cladding, general cladding, stub columns for industrial and commercial buildings is also another area that we are involved in.

In the works related to the roof, almost all types of commercial metal roofs e.g; IT4, IT5 whether or not has a decking where we use bondeck enters our business area.

With regard to façade works, we provide cladding service for other metal façade cladding. With the help of our experienced and well trained teams, we understand the assembly works of steel buildings to meet our clients' expectations. Our safe and efficient work methods have been tried and approved on most of the construction sites that we have participated in.

Detailing and Manufacturing

Despite being a young company, the design and production experience gained by the team from the Managing Director to the team members for some years now creates a leverage effect regarding all types of light and heavy steel buildings.

We trust our experienced team of steel fabricators, welders, riggers and builders that always does their work in compliance with necessary standards.

General Contracting and Construction

General Contracting and Construction

Makondo Steel Limited serves mainly as a Contractor, Sub-Contractor or service provider for small and medium-sized projects related to steel structures and RCC Structures. Our range of services allows us to deliver integrated **Zambian** solutions for all work packages like steel fabrications, erecting, façade and roof works related with steel buildings and Constructions.

The following are some among other commercial and residential projects that we have provided solutions and participated in:

Commercial Buildings

Residential Buildings
